

JFrame

```
graph BT; A[presentation.form.FileChooser_Form] --> B[JFrame];
```

A UML class diagram illustrating inheritance. At the top is a box labeled 'JFrame'. Below it is a box labeled 'presentation.form.FileChooser\_Form'. A blue arrow points from the bottom of the 'presentation.form.FileChooser\_Form' box up to the bottom of the 'JFrame' box, indicating that 'presentation.form.FileChooser\_Form' inherits from 'JFrame'.

presentation.form.FileChooser\_Form
